## **Data Flow Diagrams:**

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

## Example:

## **User Stories**

| User Type | Functional<br>Requirement<br>(Epic) | User<br>Story<br>Number | User Story /<br>Task  | Acceptance criteria                       | Priority | Release  |
|-----------|-------------------------------------|-------------------------|---|---|----------|----------|
| Customer  | Registration                        | USN-1                   | As a user, I can register for the application by entering my email, password, and | I can access<br>my account /<br>dashboard | High     | Sprint-1 |

|       |       | confirming my password.   |  |        |          |
|-------|-------|---|--|--------|----------|
|       | USN-2 | As a user, I will receive confirmation email once I have registered for the application | I can receive<br>confirmation<br>email & click<br>confirm                | High   | Sprint-1 |
|       | USN-3 | As a user, I can<br>register for the<br>application<br>through<br>Facebook              | I can register<br>& access the<br>dashboard<br>with<br>Facebook<br>Login | Low    | Sprint-2 |
|       | USN-4 | As a user, I can<br>register for the<br>application<br>through Gmail                    | _  | Medium | Sprint-1 |
| Login | USN-5 | As a user, I can log into the application by entering email & password                  |  | High   | Sprint-1 |
